PROFESSIONAL SUMMARY

- I'm a Business Data Analyst with 5+ Years of Experience Turning Raw Data into Business Value and a master's student in Management Information Systems at Auburn University at Montgomery.
- I specialize in Business Intelligence, Cloud Computing, Machine Learning, and Big Data Engineering. My passion lies in solving complex challenges through data architecture and AI-driven solutions.
- I Design and Build data driven solutions for enterprise data warehouse and data lakes.
- Worked with Data Architect and DBAs to design, develop, implement, and maintain the conceptual, logical, and physical data models for OLTP and ODS to meet customer requirements and support ETL Process.
- Experienced on Microsoft Business Intelligence Suite (Power Pivot, Power View, Power Query, Power Maps, Power BI Desktop, Power BI Service, Power BI Mobile App).

WORK EXPERIENCE

Data Analyst – Intern

Jul 2024 - Present

Cognier Inc

Atlanta (remote)

- Analyze large and complex data sets using big data tools (e.g., Hadoop, Spark, Hive) to extract actionable insight.
- Collect, clean, and process structured and unstructured data from various sources from databases and APIs.
- Work with data engineering teams to define data pipelines and ensure data quality and integrity.
- Perform exploratory data analysis to identify trends, patterns, and anomalies in large datasets.
- Designed and deployed real-time analytics dashboards using Tableau and Power BI, significantly enhancing visibility into key performance indicators and accelerating executive decisions.
- Responsible for creating and changing the visualizations in Power BI reports and Dashboards for the client Requirements.
- Experience on publishing Power BI reports of dashboards in Power BI server and scheduling the dataset.
- Collaborate with cross-functional teams to define data requirements, KPIs, and business metrics.

Research Data Assistant

Aug 2023 – May 2024

Auburn University at Montgomery

Montgomery, Alabama

- Worked on real-time projects involving data analysis, machine learning, and dashboard development.
- Used Kaggle to source real-world datasets for research projects and model development.
- Cleaned and analyzed datasets from over 2,500 responses using Python and Excel.
- Analyzed large datasets using SAS tools to extract business insights and support decision-making.
- Used version control (GitHub) for collaborative development and project tracking.
- Ensure data governance, security, and compliance standards are followed in all analysis and reporting.
- Collaborated with professors and teammates to gather requirements and deliver weekly updates.

SQL Developer

May 2021 – Jul 2023

I Charts Technologies Pvt Ltd

Hyderabad, India

- Implemented and optimized relational database queries using MySQL and Power Query to improve performance and data accuracy.
- Analyzed and tuned database performance using indexing strategies and SQL Profiler, improving overall DB performance by 40%.
- Ensure data integrity, quality, and performance through data validation routines, indexing, partitioning, and performance tuning of SQL queries.
- Created dynamic views and joins to support ad hoc requests from business stakeholders.

- Experience in SSIS, SSRS, SSAS tools in SQL Server & Support different ETL process flows.
- Conducted unit testing, debugging, and troubleshooting to identify and fix bugs, reducing issue resolution time by 25%.
- Collaborated with cross-functional teams to develop new features and enhance user experience.

SKILLS

- **Programming:** Python, SQL, DAX, Power Query.
- **Visualization:** Power BI, Tableau, Excel, Looker, Google Sheets.
- **Analytics:** Data Cleaning, Data Pipelines, Exploratory Data Analysis, ETL Process, A/B Testing.
- **Databases & Tools:** PostgreSQL, Apache Spark, MongoDB.
- **Cloud & Data Tools:** Aws (IAM, EC2, S3, Athena, Redshift, Glue), Azure, Google Cloud Platform (GCP).
- **AI & ML:** Scikit-learn, Statistical modeling, Pandas, NumPy, ML workflows.
- **Project Management:** GitHub, Agile & Jira.
- **Soft Skills:** Leadership, Problem Solving, communication, Creativity, Teamwork, Time Management.

PROJECTS

Students Marks Predictor

- Built a regression model to predict academic performance based on attendance, study time, and previous grades.
- Visualized data distributions and correlations with **matplotlib** and **seaborn** to identify key predictors.
- Collected and cleaned academic data from CSV files using **Pandas**, ensuring accuracy and consistency.
- Performed Exploratory Data Analysis (EDA) to uncover patterns such as the correlation between study time and performance.
- Containerized the application using Docker and established a CI/CD pipeline to build and push a new image every time the application is modified.
- The model helps identify at-risk students and recommend study strategies for academic improvement.

Executive KPI Dashboard

- Built an interactive Streamlit dashboard with filters, pivot tables, and visual charts to support executive decision-making.
- Integrated and transformed raw data from multiple sources using SQL queries and Excel preprocessing.
- Automated data refresh from MySQL and Excel sources, reducing manual reporting time by 70%.
- Developed a complete data pipeline that extracted, cleaned, and visualized key performance indicators (KPIs) including sales, revenue, and ROI.
- Applied data aggregation techniques to summarize key metrics and trends for quarterly and annual performance reviews.
- Integrated real-time filters, pivot tables, and visual charts to enable dynamic analysis and executive self-service insights.

EDUCATION

Auburn University at Montgomery Master of Science in Management Information Systems	Aug 2023 - May 2025
Vardhaman College of Engineering, Hyderabad Bachelor of Technology in Information Technology	Jun 2018 – May 2021

CERTIFICATIONS

- AI/BI for Data Analysts (Databricks)
- Google Data Analytics Professional Certificate (coursera)
- Programming Foundations With Python
- AI Fundamentals
